

Residual Waste Project

Public Meeting
6th November 2008

Gloucestershire's waste

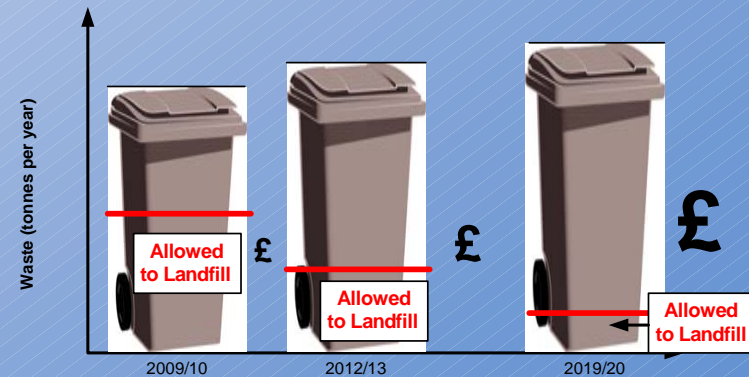

- 1.25 million tonnes of waste to manage every year
- Waste Local Plan
- Household waste

The challenge

- Landfill sites filling up
- Waste growth on average 3% past years
- EU and UK targets – landfill diversion
- Escalating costs
- **Do nothing is not an option**

Our solution

- Reduce, reuse & recycle – 3RS
- Gloucestershire target – minimum of 60% by 2020
- **Real Rubbish** – Residual Waste Project

The residual waste project

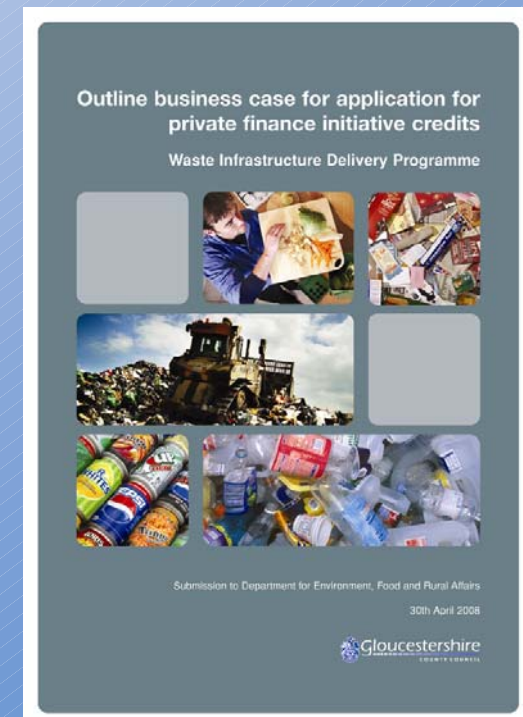

- Environmentally sustainable
- Deliverable
- Affordable
 - Cost
 - Impact on council services

Public Finance Initiative (PFI) & Outline Business Case (OBC)

- Central government requirement
- OBC must include a proven deliverable solution
- **Technology neutral**
- **Site neutral**

Next steps

- Outcome of PFI credits bid
- Early 2009 Start procurement
- Spring 2011 Award contract
- 2011 ongoing Planning
- 2013 Construction
- 2015 Operational
